

Injection Molding

TMF has decades of experience in molding all of the major materials currently used. Engineering grade resins, Thermoplastic Elastomers, Filled Materials, Clear Products, and Urethanes. We have press sizes from 24 tons to 2000 tons. We mold products using standard molds to highly complex Hot Runner systems. We can not only manufacture any plastic type product, but take it beyond just molding. We offer our customers numerous other operations to give our customers, not only the lowest total cost, but one stop shopping with this additional services:

- Complete Multipiece Product Assemblies
- Packaging
- Hot Stamping
- Pad Printing
- Painting
- Fulfillment
- Automation

We have established our company by Listening to our Customers. We want to offer the products and services that help you focus on your business. We go way beyond molding to help service our customers.
