

Diecasting & Stamping

Our qualified Engineering team possesses more than 15 years experience in mold design and producing die casting zinc and aluminum alloy products. We provide turnkey service from design to final product production. We have adopted a stringent quality system in all manufacturing processes to ensure the best quality products.

We work with well known international companies such as Samsung, Dell, Nautilus, Schwinn, Stairmaster, Bowflex, and more! We are committed to quality service, delivery and competitive prices.

The factory is equipped with the following equipment:

- Zinc Allow Die Casting Machines
- Aluminum Allow Die Casting Machines
- Hydraulic Press - 5 tons
- Electrostatic Spraying Line
- Mask Sprays
- Pad Printing Machines

We have an in-house mold shop and the manufacturing departments include; die casting, trimming, polishing, spraying, epoxy painting and stained glass departments. The factory has over 200 employees and a 150,000 sqft manufacturing area.
