

Assembly and Packaging

We offer our customers fully assembled and packaged products. We do automated and manual assemblies for some of the US largest companies. These are complex multi component assemblies that can be functionally tested as they are produced in our testing labs. These assemblies can be shipped once complete, or if you need final packaging this can be done as well. We currently manufacture and assemble products which we ship direct to our customers. These customers include Walmart, Kmart, Sports Authority, Dicks, and others too numerous to list. We do these operations to allow our customers to focus on sales and product development which drives their company. Companies like Bowflex, Nautilus, RCBS, Dynaflex, Schwinn, Water Sports, Kalmar, Panduit, Wagner, and Stairmaster have used us for many of these value added services.

We like to offer our customers "One Stop Shopping". This goal has required our facilities to be able to do complete multipart assemblies using processes such as:

- Ultrasonics
- Spin Welding
- Screwing or Welding
- Printing
- Insert Molding
- Blister Packaging
- And numerous other process to create the final product for our customers.

We have these abilities in China and in the US

to offer our customers the best possible production offering. We have regularly shipped product to Walmart, Kmart, Sports Authority, Costco, BJ Wholesale, Target, just to name a few.

We know their requirements and can ship your product directly to their distribution centers. Anyone supplying large retail customers know that these shipments must be perfect or many problems will occur. We have been doing this since 1997. We even have EDI capabilities. We can manufacture, package, and distribute your product for you so you can focus on product development and marketing your products.
